

AMENDMENTS TO THE SPECIFICATION

Please delete the present Abstract of the Disclosure.

Please add the following new Abstract of the Disclosure:

An active energy beam-curable composition for optical material is provided that comprises (A) a di(meth)acrylate represented by the following formula (1) and (B) a mono(meth)acrylate represented by the following formula (2) and/or a mono(meth)acrylate represented by the following formula (3), wherein the active energy beam-curable composition contains 10 to 90 wt % of the component (A) and 90 to 10 wt % the component (B) on the basis of the total weight of the components (A) and (B).

In the formulae, R₁ and R₃ independently represents a hydrogen atom or a methyl group, R₂ and R₄ independently represents a hydrogen atom, a methyl group or an ethyl group, R₅ to R₈ independently represents a hydrogen atom, a methyl group or a bromine atom, and l and m independently represents an integer of 1 to 6, R₉ represents a hydrogen atom or a methyl group, R₁₀ represents a hydrogen atom or a methyl group.
